## **Abbreviations and acronyms dictionary**

An acronym is a new word created from the initial letters of a long name or phrase, for example, NATO (North Atlantic Treaty Organization). An initialism is where a long phrase is abbreviated to its initial letters but the letters are pronounced individually, not spoken as a word - for example, FBI (Federal Bureau of Investigation).

## **List of Commonly Used Abbreviations**

Acronyms are similar to abbreviations, in that they are a shorthand way of expressing an idea. Acronyms are typically formed by using the first letter of each word in a phrase to form a new word. For example, the phrase "you only live once" is often shortened to YOLO. Acronyms are usually spelled with capital letters and pronounced as a new word.

Medical acronyms and abbreviations offer convenience, but those countless shortcuts can often be confusing. Now a part of the popular Dorland's suite of products, this reference features thousands of terms from across various medical specialties. Its alphabetical arrangement makes for quick reference, and expanded coverage of symbols ensures they are easier to find.

## **Dorland's Dictionary of Medical Acronyms and Abbreviations ...**

Acronyms can be words formed by the initial letters or groups of letters of words in a set phrase or series of words and pronounced as a separate word. Think NASA or SCUBA or FOMO. Then again, acronyms can be a set of initials representing a name, organization, or the like, with each letter pronounced separately.
